## Overview

The colorful jacket series offers you a thoughtful choice to spruce up LED flex linear in custom Pantone color, which is friendly for the designer to apply to the surroundings of all kinds, ending up with harmonious and agreeable décor at all times. The bright-colored finish makes the outlook conspicuous, while the black finish presents an understated beauty. All are engineered to play a role that you set up for it, contributing to adding a splash of color to your lighting project throughout the day.

## Bright-colored Finish

The bright-colored finish is available in standard R, G, B, or custom Pantone colors, enables the LED neon to emit any colorful lighting, and allows you to incorporate the color element into the bold design style easily when the light is off.

## Application

# Black/Grey Finish

Black or grey finish is the series born for those lighting projects that dislike showing off. Corresponding to the spirit of “Less is more”, it helps construct a plain and tranquil world for people by merging discreetly with the black or grey background.
