

12V Low Voltage Landscape Lighting

Light Up Your Yard Safely & Stylishly

Overview

AC/DC12V Low Voltage Flexible Linear Landscape Lights help you get inspired with top outdoor lighting ideas. The silicone-housed led landscape lights are built for outdoor use with outstanding waterproof, UV-resistant and dustproof performance, requiring little maintenance and safeguarding user safety. RGB light color options and dimmers are included to help create the right atmosphere for parties, dinners and gatherings. Houseowners can have these outdoor led light strips to highlight hard landscapes including pavilions, corridors, pot decorations and stone steps, as well as soft landscapes such as shrubs, lawns, and fountains.

Features

★ Safe & Simple to Install

Low voltage landscape lights carry no electric shock risk, with wires be directly buried in shallow trenches.

★ Personalized Color Options

- A variety of RGB light colors are available to choose from. Or you can use a dimmer to set your desired color-changing effects and create a festive atmosphere for special events.
- Uniform light output without the risk of glare.
- A higher CRI can be provided to reveal the true colors of flowers and greenery in the garden.

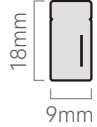

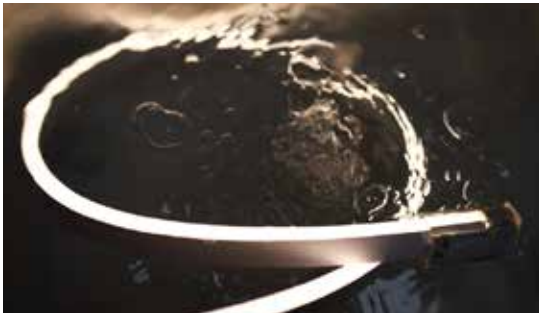

★ Energy Efficient

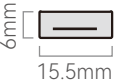

50,000 hours lifespan combines with low power to reduce electricity bills.

★ Highly Adaptable

- Compactness and flexibility allow you to bend lights into various shapes. One single light strip can run continuously, perfect for outlining yards or gardens. The IP68 rating guarantees excellent performance in wet environments indoors and outdoors.
- Fixed mounting using profiles or use with poles for pathway lighting.
- The lights can be set up discreetly and blend seamlessly in the landscape layout, unleashing more creativity in lighting designers.
